01 SUMMARY

A versatile, hardworking individual, driven to meet or exceed a company's expectations and deliver high-quality software products. Experienced in backend development and deployment across the full software development life cycle. Offers a strong background in creative problem-solving and a proven ability to multi-task and prioritize in fast-paced, high-pressure environments.

02 TECHNOLOGIES

core	Golang · PostgreSQL · Docker · Kubernetes (Helm) · CI/CD & Git		
languages	Go · C / C++ · Java (Spring) · SQL · Python	cloud	AWS · Google Cloud · Azure AKS
infra	Docker · Kubernetes · Helm · Ansible	apis	gRPC · GraphQL · REST
data	PostgreSQL · MSSQL · Kafka · Pub/Sub · Liquibase	delivery	GitHub Actions · CI/CD · Git
observability	Datadog · ELK · Grafana · Prometheus	testing	Go testing · Testify · GTest
exploring	Python · AI harness		

03 EXPERIENCE

Mar 2026 Present	Senior Software Engineer · Andpad Vietnam ▶ Built gRPC services enabling reliable, high-performance communication across internal microservices. ▶ Built a GraphQL API for the internal frontend team, simplifying data access and integration. ▶ Deployed to AWS (EC2/ECS/EKS, Lambda, S3/RDS) using GitHub Actions pipelines for smooth, reliable releases. ▶ Monitored production systems with Datadog and resolved issues to maintain system stability. gRPC · GraphQL · AWS · EKS · Lambda · GitHub Actions · Datadog
May 2025 Feb 2026	Software Engineer · Rikkeisoft Project: Synapse ITS ▶ Built a provider-agnostic OIDC authentication system on Keycloak, enabling single sign-on for enterprise clients across identity providers. ▶ Developed Go services to route data from a high-volume IoT device fleet into Google Cloud Pub/Sub. ▶ Developed Go parsers to decode IoT byte-stream data, improving processing accuracy and scalability. ▶ Developed unit tests with Go's testing package and Testify, catching bugs early in development. ▶ Refactored existing tests and added new test cases, raising code coverage above 90% and improving test quality. Go · Keycloak · GCP Pub/Sub · IoT · Testify

Nov 2023
May 2025

DevOps Engineer · Rikkeisoft

Project: [Data Dynamics](#)

- ▶ Built CI/CD pipelines across multiple projects, reducing manual deployment work.
- ▶ Established a standard Git branching strategy across teams.
- ▶ Built a platform installer with Ansible for consistent environment setup.
- ▶ Set up centralized logging and monitoring with the ELK stack, Grafana, and Prometheus for early issue detection.
- ▶ Built Kafka producers and consumers for real-time data exchange between microservices.
- ▶ Integrated Okta authentication into the REST API server to control access.
- ▶ Managed sprint planning and task delegation to keep delivery on schedule.

CI/CD · Ansible · Kafka · ELK · Grafana · Prometheus · Okta

Feb 2023
Sep 2024

Software Engineer · Rikkeisoft

Project: [AllianceBernstein](#)

- ▶ Maintained the core application and resolved high-priority customer incidents to sustain uptime.
- ▶ Led the migration from SVN to Git across multiple teams.
- ▶ Migrated a legacy application from VMs to an AKS cluster (lift-and-shift), improving scalability.
- ▶ Built CI/CD pipelines for both the application and multiple MSSQL databases using Liquibase, automating deployment end to end.

AKS · Kubernetes · Liquibase · MSSQL · Git

Feb 2023
Aug 2023

Software Engineer · Rikkeisoft

Project: [Welby](#)

- ▶ Designed a database schema based on the FHIR standard to support data interoperability.
- ▶ Developed Go unit tests for the new schema to catch data issues early.
- ▶ Built custom Go migration tools to move data without loss.
- ▶ Built the repository layer for a Go API backed by PostgreSQL, enabling reliable data access.

Go · PostgreSQL · FHIR · Data migration

May 2022
Feb 2023

Software Engineer · Toshiba Software Development

- ▶ Improved the core OCR engine (C/C++) for better accuracy and performance.
- ▶ Built a Java (Spring) REST API layer on top of the OCR engine for use by other services.
- ▶ Built a proof-of-concept CI/CD pipeline deploying to AWS, demonstrating the value of automated deployments.

C/C++ · OCR · Java Spring · AWS

Sep 2020
May 2022

Software Engineer · Toshiba Software Development

- ▶ Maintained a SCADA server system, ensuring reliable operation in an industrial environment.
- ▶ Improved processing performance by 20% using a C/C++ thread-pool multi-threading design.
- ▶ Developed unit test plans with GTest to validate system functionality.

C/C++ · SCADA · Multithreading · GTest

04 CERTIFICATES

AWS Certified Solutions Architect – Associate

May 27, 2023 · EP2SK0FCW2QQQWWR

AWS Certified Cloud Practitioner

Sep 24, 2022 · EJQ8R24KZBF110C9

TOEIC

Jan 2021 – Jan 2023 · 810 / 990

05 EDUCATION

Hanoi University of Science and Technology

BS in Automation Engineering Technology

Sep 2016 – May 2020
